

# High Performance Browser Networking

© ILYA GRIGORIK

Performance is a feature. This book provides a hands-on overview of what every web developer needs to know about the various types of networks (WiFi, 3G/4G), transport protocols (UDP, TCP, and TLS), application protocols (HTTP/1.1, HTTP/2), and APIs available in the browser (XHR, WebSocket, WebRTC, and more) to deliver the best—fast, reliable, and resilient—user experience.

★★★★½ (463): [GoodReads](#) [Amazon](#) [O'Reilly](#)

“ This book is required reading for anyone who cares about web performance; it's already established as the go-to reference on the topic.

—Mark Nottingham (IETF HTTPBis Chair)

## Table of Contents

### Networking 101

#### 1. **Primer on Latency and Bandwidth**

- Speed Is a Feature
- The Many Components of Latency
- Speed of Light and Propagation Latency
- Last-Mile Latency
- Bandwidth in Core Networks
- Bandwidth at the Network Edge
- Delivering Higher Bandwidth and Lower Latencies

#### 2. **Building Blocks of TCP**

- Three-Way Handshake
- Congestion Avoidance and Control
- Bandwidth-Delay Product
- Head-of-Line Blocking
- Optimizing for TCP

#### 3. **Building Blocks of UDP**

- Null Protocol Services
- UDP and Network Address Translators

#### 4. Transport Layer Security (TLS)

- Encryption, Authentication, and Integrity
- HTTPS Everywhere
- TLS Handshake
- TLS Session Resumption
- Chain of Trust and Certificate Authorities
- Certificate Revocation
- TLS Record Protocol
- Optimizing for TLS
- Testing and Verification

+

+

+

+

## Performance of Wireless Networks

#### 5. Introduction to Wireless Networks

- Ubiquitous Connectivity
- Types of Wireless Networks
- Performance Fundamentals of Wireless Networks
- Measuring Real-World Wireless Performance

+

#### 6. WiFi

- From Ethernet to a Wireless LAN
- WiFi Standards and Features
- Measuring and Optimizing WiFi Performance
- Optimizing for WiFi Networks

+

+

#### 7. Mobile Networks

- Brief History of the G's
- Device Features and Capabilities
- Radio Resource Controller (RRC)
- End-to-End Carrier Architecture
- Packet Flow in a Mobile Network
- Heterogeneous Networks (HetNets)
- Real-World 3G, 4G, and WiFi Performance

+

+

+

+

+

#### 8. Optimizing for Mobile Networks

- Preserve Battery Power
- Eliminate Periodic and Inefficient Data Transfers
- Anticipate Network Latency Overhead
- Design for Variable Network Interface Availability
- Burst Your Data and Return to Idle
- Offload to WiFi Networks

+

+

# HTTP

## 9. Brief History of HTTP

- HTTP 0.9: The One-Line Protocol
- HTTP/1.0: Rapid Growth and Informational RFC
- HTTP/1.1: Internet Standard
- HTTP/2: Improving Transport Performance

## 10. Primer on Web Performance

- Hypertext, Web Pages, and Web Applications
- Anatomy of a Modern Web Application +
- Performance Pillars: Computing, Rendering, Networking +
- Synthetic and Real-User Performance Measurement
- Browser Optimization

## 11. HTTP/1.X

- Benefits of Keepalive Connections
- HTTP Pipelining
- Using Multiple TCP Connections
- Domain Sharding
- Measuring and Controlling Protocol Overhead
- Concatenation and Spriting
- Resource Inlining

## 12. HTTP/2

- Brief History of SPDY and HTTP/2
- Design and Technical Goals
- Binary Framing Layer
- Streams, Messages, and Frames
- Request and Response Multiplexing
- Stream Prioritization
- One Connection Per Origin
- Flow Control
- Server Push
- Header Compression
- Upgrading to HTTP/2
- Brief Introduction to Binary Framing +

## 13. Optimizing Application Delivery

- Optimizing Physical and Transport Layers
- Evergreen Performance Best Practices +

## Browser APIs and Protocols

### 14. **Primer on Browser Networking**

- Connection Management and Optimization
- Network Security and Sandboxing
- Resource and Client State Caching
- Application APIs and Protocols

### 15. **XMLHttpRequest**

- Brief History of XHR
- Cross-Origin Resource Sharing (CORS)
- Downloading Data with XHR
- Uploading Data with XHR
- Monitoring Download and Upload Progress
- Streaming Data with XHR
- Real-Time Notifications and Delivery
- XHR Use Cases and Performance

### 16. **Server-Sent Events (SSE)**

- EventSource API
- Event Stream Protocol
- SSE Use Cases and Performance

### 17. **WebSocket**

- WebSocket API
- WebSocket Protocol
- WebSocket Use Cases and Performance
- Performance Checklist

### 18. **WebRTC**

- Standards and Development of WebRTC
- Audio and Video Engines
- Real-Time Network Transports
- Establishing a Peer-to-Peer Connection
- Delivering Media and Application Data
- DataChannel
- WebRTC Use Cases and Performance
- Performance Checklist
